Dipper

Produced from half a sheet of plywood the layering creates a soft diffused horizontal light, as well as a down light.

A low energy bulb is a white light and this is softened and rendered more natural in colour by its reflection off the wood, almost like an old school incandescent glow. At certain angles the light effect is almost like a moiré pattern. The collection is now being developed to form a table lamp and floor lamp.

Design	VW+BS
Year	2013
Material	Spun aluminium+ birch ply
Product Type	Pendant Light
