

PRESS

The thickest industrially Pressed glass artefacts designed and engineered to catch and refract light, and to last for ever. PRESS is a series of heavyweight grooved vases, bowls and candleholders made of fat, chunky coils of pure and clear transparent glass. Bold in silhouette and simple in function they are manufactured by dropping big globs of molten glass at 1,200 degrees centigrade and pressed in two- or three-part iron moulds to create immediately familiar silhouettes.

The PRESS collection includes Large, Medium and Small Bowls, Stem, Medium and Large Vases and Tea Light Holders in two different shapes.
