May

# May

The May luminaire consists of up to three lights suspended from each other that illuminate indirectly with a particularly flat radiation (Uplight), directly diffuse all around (Sidelight) and directly brilliant (Downlight).

Distances between them can be freely selected with the lower lights each connected to the one above.

The lights can be used all three together, in any combination in twos or also individually.

The dim-to-warm lights can be controlled independently of each other or in groups by Bluetooth or Dali via classic wall switches, remote control or apps.

## Combinations:

## Elements:

## Material:

Anodized aluminium

Frosted glass

## Dimensions:

Uplight: Ø 330 mm, H 22 mm

Sidelight: Ø 200 mm, H 195 mm

Downlight: Ø 22 mm, H 113 mm

## Weight:

Uplight: 1,5kg

Sidelight: 0,9kg

Downlight: 0,1kg

## Light sources:

Uplight: LED, 3000K, 5000lm, CRI 90, extreme flat radiation

Sidelight: LED, dim-to-warm 1800K – 3000K, 3000lm, CRI 90

Downlight: LED, dim-to-warm 1800K – 3000K, 600lm, CRI 90

## Dimming:

Bluetooth Mesh / Casambi, Dali

## Schutzart:

IP20
