

PRESS SURFACE LARGE LED

Press is a series of lights made from the thickest and most transparent glass with a satisfyingly rounded linear surface detail. The ribbed glass creates diffusion of the light source and projects linear and stripy patterns. Press Mini is a new surface light which is more compact in size, lighter in weight and designed to be clustered in multiples and paired with the larger surface light. The metal dome cap can be interchanged depending on the customer's colour preference - silver, gold and black caps are sold with the surface lights.
