BAMBOO FOREST

Pendent light PC1331

Designed by: Fumie Shibata Desing SS company

Description

Bamboo Forest by Fumie Shibata draws inspiration from the vertical contours rising up in stands of bamboo. Conceived to evoke a unique atmospheric ambience, the handsculpted glass forms a bamboo stalk complete with the typical nodal ring, where the material thickens, creating a soft accent in the form of subtle shadows. With different types and varying positions of the node on the stalks, thanks to which the origins of the collection are at once recognizable, compositions of multiple lights transform the interior into a sanctuary replete with the soothing tranquillity of a natural bamboo forest. The lights also work well as solitary pieces. A diffusor with 90% transparency bends the light and creates a striking accent in the interior. The lights in the Bamboo Forest collection come in six different types and are available in either opaline or brown or light grey smoke glass. The innovative BROKIS connector enhances the overall variability of the lights by simplifying not only installation of large sets but also maintenance and cleaning. Furthermore, the connectors make it easy to rearrange the lights for a refreshing new lumiscape any time the mood strikes. Bamboo Forest is unique for the unusual shape of the lights as well as for the possibilities the collection offers in creating both original combinations and single-point accent lighting in interior spaces.

**Tech. description** The pendant comprises an outer dural fixture housing an LED module, an inner dural fixture, a diffusor, and a glass shade anchored between the two fixtures via a threaded connection. The pendant is hung from a metal ceiling canopy containing the electronics by means of the power cable fitted with a BROKIS connector.
