# ORBIT SERIES TABLE

The Orbit series draws direct inspiration from the original light source—the sun—using an opalescent glass globe. Taking central stage, this glowing sphere is enclosed in a wire cage evocative of the familiar planetary manoeuvre.

## CARE INSTRUCTIONS

Always wear clean gloves when handling the luminaire. Clean finished surfaces with a soft, lint-free cloth. Clean glass with a clean cloth and glass cleaner.

For replacement parts contact ANDlight directly.

Replace Lamping with G9 LED lamps. Never exceed the recommended wattage and voltage (MAX 5W,130V/230V), as doing so may damage the luminaire or cause a fire.

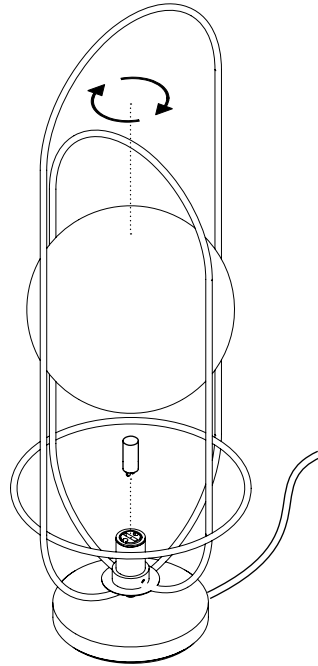

## INSTALL LAMPING

### Remove the glass globe and install the G9 lamp.

To remove the glass globe, spin it counter clockwise until it is free.

To install the G9 lamp, push the lamp into the socket until it 'clicks' onto place.

Re-install the glass globe.

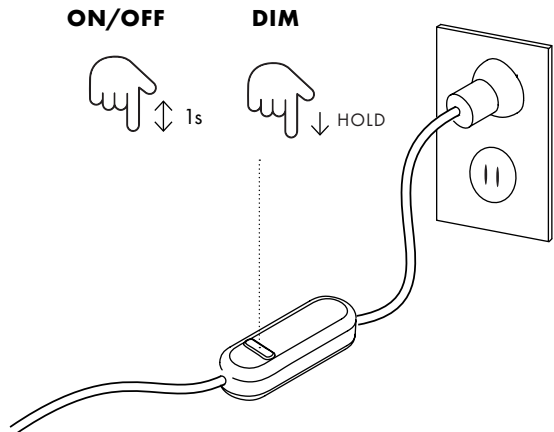

## ON/OFF + DIMMING

### Plug the Orbit into the wall receptacle.

Push and release the switch for on/off.

Push and hold the switch to adjust brightness.
