Description

Set off on a journey through the heavens with this enchanting masterpiece of stellar beauty, a mesmerizing nebula of gracefully intermingling lights cast against the night sky. This bespoke collection of pendants is based on an abstract astral form, which flows seamlessly into three distinct objects, Atria, Lyra, and Vega, each a work of art in its own right among its celestial companions. These stars project a subtly different optical effect depending on the viewing angle, appearing to variably wax and wane or come to rest in a state of symmetry. Suspended on slender coaxial cables of varying lengths, the delicate handlbown glass shades are available in three variants: opaline, pearl pink opaline, and pearl grey opaline. The collection offers seven predefined sets of various sizes, each with its own custom ceiling canopy, but there is no limit to how the lights can be mixed and matched in original compositions. Starcloud thus provides a remarkable degree of variability, inviting users to create their own wholly unique interior starscapes.
