Glass: Hand Blown Bohemian Crystal Glass

It's said that a sphere is the most perfect shape in the universe. And sometimes, one can discover the whole universe within this one shape. The variability and immeasurable beauty of the Universe is captured in Spacey thanks to a special technique called lithyalin. It looks like gemstone, yet it is actually glass. This technique was invented in Northern Bohemia more than 200 years ago and has now been resurrected in the same region by a Czech designer.
